

An aerial photograph of the Sydney Harbour Bridge and the city skyline at sunset. The bridge is a large steel arch structure spanning the water. The city buildings are visible in the background, and the sky is a mix of blue and orange. The water is dark blue with some whitecaps.

Wis Australia

Audit | Accounting | Tax | Advisory
Corporate Finance | People Services

Foreword

Wis Australia is a full-range professional service group and has been dedicated to offering professional services to multinationals and local businesses to support their growth for many years. With a capable team of bilingual professionals, Wis Australia is strongly positioned in providing pragmatic solutions to meet our clients' needs for business compliance and advice.

As a key founder of Wis Australia, I am proud to deliver you this presentation to highlight Wis Australia's professional service capabilities, approaches and real solution examples that we have been continuously practicing and improving. This presentation also explores our core values, missions, client credentials and team's expertise and qualifications.

The heightened compliance requirements, coupled with the tightening of government regulation, are posting greater challenges to Businesses and our clients in Australia. In the later part of this document, we also take you through some examples of how we help our clients turn complexity into simplicity and overcome challenges facing them - such as audit and assurance requirements, tax planning and compliance, shortage of experienced bilingual workforces, acquisition of local businesses.

Please feel free to contact me if you would like to discuss any aspects of this presentation. Our team is always ready to assist you in every way.

03. Our Clients

Multinationals

We provide services to many multinationals in Australia. Most of them are overseas listed entities or reputable international private groups, to help them settle down in Australia and achieve their Australian strategies smoothly. We are proud of being capable of covering service needs where top-tier firms are not able to satisfy.

Local Business

We also provide services to many local businesses and entrepreneurs, to help them achieve sustainable long-term success and maximize their value. We have both standardised and tailored approach for them to deliver what they need for now and for future.

03. Our Clients

03.

Client Stories

01.

Assistance in Acquisition

A client wanted to acquire a business segment of a listed company in Australia. We assisted them at the very beginning with structuring of the acquisition from the buyer perspective and performed a well-tailored financial due diligence of the business segment. We also advised on key inputs of the valuation. Our practical all-rounder services and extensive experience in merger and acquisition provided valuable findings for the client's decision and significantly reduced the client's transaction costs compared to other service providers.

02.

Hedging Accounting

Without hedging accounting, the income statement is vulnerable and fluctuates significantly. We help clients put the big-four-auditor-accepted hedging documentation in place to meet the requirements of hedging accounting. As a result, the statement of profit & loss of the client becomes more consistent and reflective of the substantial business.

03.

Financial Reporting

In Australia, the preparer of the financial report is normally required to be different from the auditor. Hence, the competency of the preparer of the financial report is very important for companies and the audits. As we are licensed company-auditors, we fully understand the reporting standards and auditor's requirements. We have assisted our clients to save cost in preparing financial reports accepted by the big 4 auditors and coordinate directly with auditors to save the client time significantly.

03.

Client Stories

04.

Long-term Tailored Service

Since 2014, we've supported a large Chinese state-owned company's entry into Australia, initially aiding with incorporation and setting up accounting processes. As in-house accountants, we ensured compliance with the parent company's standards, offering routine bookkeeping and reporting services. We also helped establish an internal finance team before transitioning routine tasks to them. Our focus has since shifted to providing advice and support for complex and project-related endeavours.

05.

Audit Approach

A real-estate company has grown to reach the 'large' threshold and a statutory audit is required. Meanwhile one of the big 4 accounting firms they hired, was holding off the tax return due to the poor quality of the financial records and reports. We were engaged as the external auditor of the company. We took a practical substantive approach to perform a detailed investigation of audit findings and proposed audit adjustments for all identified issues based on the audit evidence and managerial responses. With the assurance provided in the audited financial report, the tax return was finalised within the due date. We have also provided insights to help them improve the process of financial reporting.

06.

Specialist Advisory

Alongside the development of the company, we provide accounting and tax advice on complex acquisition and hedging accounting to meet management's internal needs and the internal corporate auditors' requirements. We also provide advice on ad-hoc questions raised by clients on a day-to-day basis to give them support in an efficient way. We have built seamless communication and trust in the client's team together with their other professional service providers like lawyers, banks, and auditors.

04.

Membership & Licenses

Membership & Licenses

With a broad spectrum of service licenses and capabilities, Wis Australia service entities are capable of delivering more comprehensive and integrated services to meet our clients' needs. We are also confident in partnering with high-profile clients and co-operating with other service providers.
